Re: Notification of RCRA Corrective Action Baseline
Trinity Industries Inc.
PAD004342556

The purpose of this letter is to inform you that the United States Environmental Protection Agency (EPA) and the Pennsylvania Department of Environmental Protection (PADEP) are beginning the final phase of evaluating facilities under the Corrective Action Program within the Resource Conservation and Recovery Act (RCRA). For many years, EPA and PADEP have been working with the highest priority concerns at current and former RCRA facilities. In the past, you may have been approached by EPA concerning RCRA Corrective Action. This letter is to notify you that your facility will be listed on EPA's RCRA Corrective Action 2020 Baseline Universe which will be released in mid April 2007.

EPA's current national program goal is to address all remaining facilities subject to the RCRA Corrective Action Program by the year 2020 (www.epa.gov/osw/vision.htm). EPA and PADEP plan to address corrective action in a manner which is consistent with your plans for the property while still addressing the environmental issues at your site.

EPA, PADEP, and/or our designated contractor have begun to make site visits at the remaining facilities subject to RCRA Corrective Action. Our experience shows that the initial site visit will help us both determine what, if anything, needs to be done to meet the RCRA Corrective Action requirements at your facility. In some cases little or no environmental investigation or cleanup may be necessary. For facilities where EPA and PADEP determine that the corrective action requirements have already been met, the Agencies will issue a final agency decision that reflects satisfaction of the program and no further action is necessary.

After the site visit is completed, EPA and PADEP will meet with you to determine the best way of meeting corrective action requirements. A variety of options are available and you can learn more by visiting our website at www.epa.gov/reg3wcmd/correctiveaction.htm. In Pennsylvania, many facilities are taking advantage of the option available under the **One Cleanup Program**, which allows facilities subject to RCRA corrective action the option of using Pennsylvania's Act 2 program for meeting corrective action requirements.

On behalf of EPA Region III and the PADEP, we would like to thank you in advance for working with the Agencies to achieve the 2020 Corrective Action goal. If you have questions concerning this letter please contact Paul Gotthold, EPA, at 215-814-3410 (gotthold.paul@epa.gov) or Grant Dufficy, EPA, at 215-814-3455 (dufficy.grant@epa.gov).

Sincerely,

Paul J. Gotthold, Chief
PA Operations Branch
EPA Region 3

CC: Rick Shipman, PADEP
